SUMMARY

Computer Science graduate with hands-on experience in Java, object-oriented programming, SQL database management, and process automation. Detail-oriented and quick to adapt, eager to apply strong programming logic and collaborative problem-solving to build clean, reliable software as a Developer.

EXPERIENCE

Admin Generalist

XLR8 Courier Services Inc. **January 2026 - August 2026**

- Developed a custom Google Apps Script (JavaScript) in Google Sheets to automate raw data cleanup, conditional formatting, and POD rate calculations—reducing manual processing time while delivering real-time hourly productivity reports to team leads.
- Conducted regular audits of rider proof-of-deliveries, non-delivery reports, and pickup exceptions to ensure accurate system records and full compliance with standard operating procedures.
- Handled Return-to-Seller (RTS) processing, created system-generated shipping manifests, and prepared inventory for outbound dispatch to regional sorting hubs.
- Co-managed daily administrative duties for two branches as part of a 3-admin team, driving operational accuracy to help rank as a Top 3 performing warehouse in Manila.

PROJECT

Manoky: 2D Action Platformer

Solo Developer • April 2023 - June 2023

- Implemented game loop systems for player health tracking, dynamic UI updates, level progression, and basic enemy path finding logic.
- Integrated custom 2D sprite sheets, tilemaps, and UI assets into Unity, adapting variable structures and component references to customize project features.
- Implemented dynamic camera controls, particle effects, and audio managers to improve visual feedback and player engagement.
